This tutorial covers Excel 2010 If you use a different version of Excel click on the version below:CSV is a popular format to transfer data between services and applications, because of its simplicity: only text values and value separators.. If a cell contains a comma, the cell contents are enclosed in double quotation marks.. In the Save as type box, choose the format CSV (Comma delimited) Browse to the location where you want to save the new text file, and then click Save.. Sample of file in Excel 2010Click here to download the sample XLSX file displayed here where you can see the difference between cell contents and displayed values.. To convert the Excel spreadsheet to CSV, we will use the Save As command with the CSV Format option for file type. [Cubase Le 5 Download Mac](#)
